

LEAPER-56

Pocket Universal Programmer

/ Smart-phone size and ICT level universal programmer

Introduction

The LEAPER-56 is a pocket size universal programmer. It provides with 75MHz bandwidth and $< \pm 2.5\text{nS}$ signal skew just in smart-phone size. The programming efficiency is much better than the other programmers on the market in any time and any condition.

By letting your PC or laptop connect with LEAPER-56, it will perform your outstanding ability of development and debugging. You can easily have professional factory-level productivity.

Features

- Portable mini size. Without socket, only 136mm(L)* 90mm(W)* 20mm(H). You just need to connect with USB cable to use. No additional power supply.
- Provide with DUT 75MHz bandwidth and $< \pm 2.5\text{nS}$ signal skew. In addition to the high processing speed, you can verify whether the ICs processing frequency meets the specifications.
- Via USB HUB, you can connect multiple LEAPER-56s to do gang programming. It makes development and mass production proficient.
- Provide with DUT device pin checking and memory components ID verification. Ensure the best yield rate of processing.

LEAPER-56 is most suitable on the mobile environment.

The best way to perform your professional capacity and working efficiency.
